

Take your
unmanned
operations to the
next level with
**Johnnette-NPNT
Module**

More reliability with
increased affordability

Delhi NCR | Chennai | Dubai

Why Johnnette NPNT Module?

NPNT Compliance has been made mandatory for all Drones above 250 gms in the Indian airspace.

Johnnette Technologies is proud to present Johnnette NPNT U2.0, a smaller, faster and safer hardware solution that helps Drone manufacturers, OEMs, Training Schools, Systems Integrators, and Resellers integrate their drones with Digital Sky. As of 15 Aug 2020, nearly 70% of Indian Airspace has been opened for NPNT compliant drones. What are you waiting for? Order the NPNT Module today and make your drone NPNT Complaint.

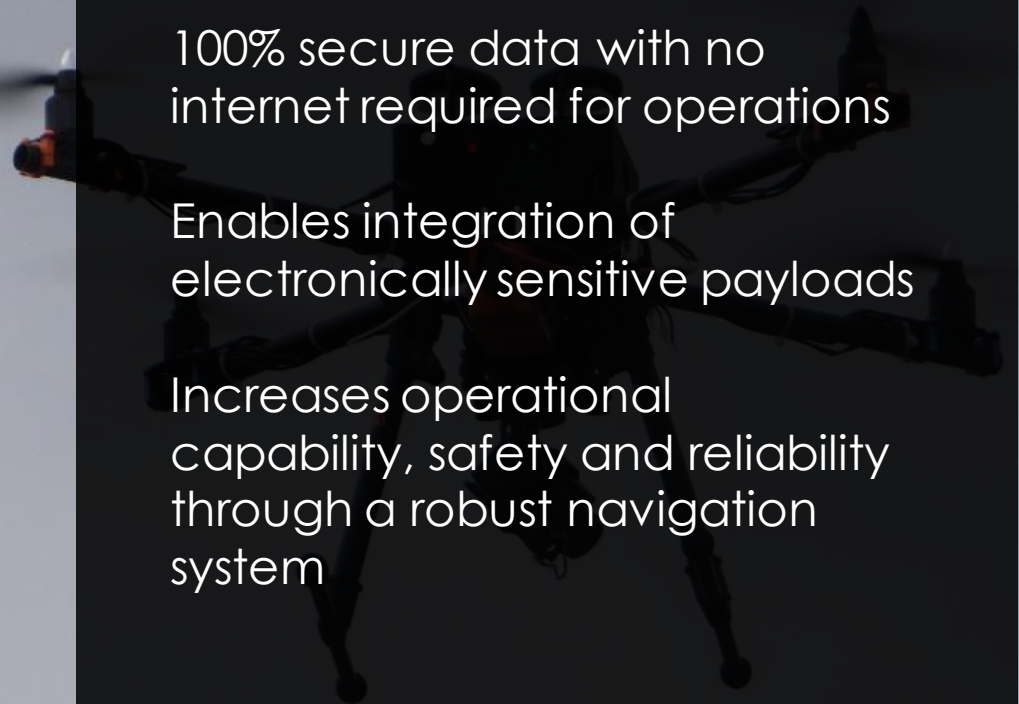

Common with Johnnette's family of Unmanned Systems

State-of-the-art, modular propulsion system powered by autonomous intelligence

100% secure data with no internet required for operations

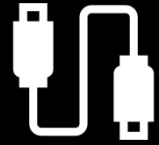

Enables integration of electronically sensitive payloads

Increases operational capability, safety and reliability through a robust navigation system

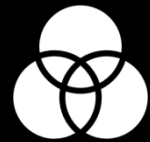

Low - priced

Plug and Play

Redundant power supply

Light weight and extremely small

Compatible with all open source FC

Johnnette- NPNT U 2.0 Specification

| STRUCTURE | SPECIFICATIONS | FEATURES |
|---|--|--|
| Dimensions 80mm x 64mm x 37mm | Processor ARM-Cortex 1.4GHz Quad-core | GPS Ublox 7M |
| Weight 120 gm. | RAM 512MB | Failsafe ATMEGA Co-Processor for failsafe |
| Material PLA/ABS | Internal Memory 16GB | Power Supply Redundant Power Supply |
| | WLAN 802.11 b/g/n/ac | LEDs Multi-function Indicator LEDs |
| | Input Voltage 5Vdc – 25Vdc | |

Our Customers

Leading companies and organizations use our platforms to make key decisions to reach their goals. Our clientele also includes defense and paramilitary.
